## The Best Finishing Spray For Your Hair

Recently I was introduced to a finishing spray by Prive called Finishing Texture Spray/Spray deMatifiant Texture that I can't live without. It works on both straight or curly hair to add a little *va va voom!*

It's enriched with *betula alba leaf, ginko biloba, and echinacea*. This Herbal Blend #89 delivers the most amazing sexy texture with weightless volume and incredible body. It makes my hair feel thicker and my hair is very fine. Some of the featured benefits besides volume & body include: *glycolic extracts that freshen, rejuvenate & moisturize your hair, antioxidants & oxygenation to protect & rejuvenate your hair, antiseptic qualities that promote healthy hair & scalp, and defrizzing agents that add smoothness.*

*Prive's Finishing Texture Spray* can also be sprayed onto damp hair to add more texture. And if you are using a hot styling tool don't forget to spray your hair first with this amazing product. Not only will you get great, flexible, frizz-free hold, but also, the more heat you add the more shine you'll get! The best part is your hair will have incredible movement with no product build up, drying or flaking.
