## For the Love of Locks: Taming the Wild

Though we all love the oppressive heat of June, July, and August, we cannot escape the fact that with heat comes humidity, and with humidity, frizz. We might as well accept that during these months, our hair is going to look untamed, beastly, wild. Luckily, summer is the time to look untamed, beastly, and wild - and with a little help from these fabulous products, we can create a controlled untamed, beastly, and wild look.

**Privé Grooming Creme** - I don't know what I love more about this product: the fact that it comes in a tube (almost nothing save toothpaste comes in a tube these days) or that it smooths even the craziest frizz from your hair. With rosemary and spirulina, ginseng and chamomile, this creme is lightweight, smells subtly like the herbs it contains, and can be used on both dry and damp hair.
