## **How To Get Fuller, Fabulous Hair**

Wednesday, May 06, 2009

Unfortunately as I get older, my hair feels like it is getting older too. It isn't as thick, and doesn't behave the way I would like it to. I have tried so many styling products, but after a while they just stop working. Recently after a visit to the **Prive Salon** in Hollywood, the fabulous and talented **James Carameta** worked his magic on my locks, and when he was done, he sprayed the **Finishing Texture Spray/Spray deMatifiant**. The result was let's just say, amazing! I haven't had volume and texture like that in years, and after a night of sleep, it still looked great.

It works on both straight and curly hair which is such a plus, since so many styling products do not. Ingredients like *betula alba leaf, ginko biloba, and echinacea*, blended together for beautiful results. Texture with weightless volume and incredible body. My hair continues to feel thicker everytime I use it. In addition to the amazing volume and body that you get, other benefits include, *glycolic extracts that freshen, rejuvenate & moisturize your hair, antioxidants & oxygenation to protect & rejuvenate your hair, antiseptic qualities that promote hair & scalp, and defrizzing agents that add smoothness.*

**Prive's Finishing Texture Spray** can also be sprayed onto damp hair to add more texture. Perfect for the summer when a hot blow dryer feels more like a blow torch. And don't forget to spray your hair before you use your flat iron, or in my case, a curling iron. It will control the frizz, and give your locks a gorgeous shine. The entire line of styling products, as well as shampoo's and conditioner's are fantastic. You can purchase any of them at all Prive Salons, in Los Angeles, New York, and Florida, or for a Prive partner salon near you please visit [www.priveproducts.com](http://www.priveproducts.com).
